Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1877 Excerpt: . . . of the preceding year; in the present year the rate of the Poona Division, is much lower than that of either of the others, but in a comparison the small number of observations deprives tjais result of any particular value. Diseases of the Respiratory System. --Compared with the preceding year there is a reduction iu the rate of admissions for each of the Divisions, and also for Depots; as in 1875 the rate for the Mhow Division exceeds that of either of the others. Bombay. Diseases of the Digestive System. --The rate of admissions of the Presidency Division is 486 per 1, 000 men, and that of the Poona is 58-lower than in the preceding year; on the other hand the rate of the Mhow Division is 27-and that of Depots is 204 per 1, 000 men higher. In the Poona Division, with a lower admission, there is a higher death rate; in the Presidency, both rates are lower; in the Mhow, a higher admission and lower death-rate coexist: the death-rate of Depots is double that of 1875. Diseases of the Urinary System. --The rate of admission is in the Poona Division lower by 22-6 per 1, 000 men than in the preceding year, that for each of the other Divisions is higher, for Mhow, the increase amounts to 25-2 per 1, 000 men. Poisons. --Compared with 1875 there is an increase on the rate of admissions in the Presidency and in the Poona Divisions, a...
