The earliest mining and metallurgical operations of which traces remain were those in Egypt that dealt with the ores of gold. From pictorial rock carvings in upper Egypt, as also from Egyptian hieroglyphics, it is found that the search, desire, and use of gold extended back some 3000 to 4000 years before the Christian era. Starting with use as an ornament, gold soon became the trading counter and has been an emblem of value to the human race as far back as history extends. Appreciation of the value of gold has been maintained through the centuries by the difficulties connected with obtaining the metal. With early primitive methods, only the gold most abundant and easily worked and visible was first sought and this was found principally in alluvial deposits, but as knowledge, mechanical skill and tools and appliances were developed by the human race gold mining was extended to more difficult alluvial, vein, and lode deposits....

Reviews

This publication may be really worth a go through, and a lot better than other. It really is written in simple terms and never difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.
